

Title1Next™: Optimize Title I Administration and Operational Efficiency

Cloud-Based Compliance and Document Management Software

Title1Next is a cloud-based software solution designed to support and streamline administration of your district's Title I program.

PCG's Title1Next provides documentation management and supports compliance monitoring for all Title I, federal programs, central office administration, and related departments. The platform ensures central office administrators can quickly disseminate, evaluate, and approve an unlimited number of federal programs and central office department documents.

Title1Next can help your district:

Increase operational efficiency. From streamlined data and documentation to built-in program management and communication tools, Title1Next encourages more efficient, collaborative, and productive Title I operations within the federal program's administrative office and school campuses.

Improve compliance and accountability. The integrated monitoring and alert system within Title1Next helps ensure that schools submit documentation for monitoring on time, without second-guessing contents of paper folders or crates in schools. This documentation is also stored in the cloud for multiple academic years, which is pivotal for districts selected for monitoring!

Support Every Student Succeeds Act (ESSA) implementation. Whether soliciting feedback from community and parent engagement initiatives or analyzing and reporting the effectiveness of expenditures on student impact and achievement, Title1Next provides the tools districts need to facilitate ESSA implementation.

Key Features

- Unlimited and secure storage, eliminating the need for hard copy storage
- Status reports and filtering analytics
- Compliance calendar
- Email reminders and automated compliance alerts and notifications
- Administrator dashboard
- Real-time monitoring alerts for tracking and approving compliance documents
- Secured internet servers with mirrored website backups, password security enforced, including auto-logoff features
- School-based private folders including restricted access to stored content based on user roles
- Online and in-person training options available
- Help desk support
- Streamlining audit processes
- Reduces staff workload
- Reduces the risk of losing required documentation
